NGUYEN VAN AN

Software Engineer Intern Candidate

Email: an.nguyen.dev@example.com | Phone: +84 90 123 4567 | Ho Chi Minh City, Vietnam
Portfolio: https://an-nguyen.dev | GitHub: https://github.com/annguyen-dev

SUMMARY

Final-year Computer Science student passionate about backend development and machine learning. Comfortable shipping full-stack apps and contributing to open source.

EDUCATION

University of Science, VNU-HCM ? B.Sc. in Computer Science

2021-09 to 2025-06. GPA: 3.6/4.0. Relevant: Data Structures, Databases, ML.

EXPERIENCE

Backend Developer Intern ? FPT Software (2024-06 to 2024-09)

- Built REST APIs in Python/FastAPI serving 5k daily requests.
- Wrote unit tests and reduced a slow endpoint latency by 40% via query tuning.
- Collaborated with a team of 6 using Git and code reviews.

PROJECTS

SmartQueue ? Real-time queue management system

A full-stack app (React + FastAPI + PostgreSQL + WebSocket) used by a campus clinic. Handles live updates and role-based auth. Live demo + source available.

GitHub: https://github.com/annguyen-dev/smartqueue

Technologies: React, FastAPI, PostgreSQL, WebSocket, Docker

MiniGPT-Notes ? Note summarizer using a small LLM

CLI tool that summarizes markdown notes with a local model. Includes benchmarks.

GitHub: https://github.com/annguyen-dev/minigpt-notes

Technologies: Python, PyTorch, Typer

Todo App ? Practice project

A basic todo list to learn CRUD. No live link.

Technologies: HTML, CSS, JavaScript

OPEN SOURCE

- Merged 3 bug-fix PRs into the FastAPI-users library (docs + validation).
- Participated in Hacktoberfest 2023.

SKILLS

Programming: Python, JavaScript, Java, SQL

Frameworks: FastAPI, React, Flask

Tools: Git, Docker, Linux, PostgreSQL, MongoDB
